

With deepest sadness ESN received the news about the untimely death of ISN President Prof Kazuhiro Ikenaka. We all remember Kaz as a wise, generous, entertaining person, who made a huge impact on neurochemical community over the years. His legacy will be embedded in the history of ISN and its sister societies whom Kaz so kindly welcomed under the ISN roof. Our thoughts are with his wife, family, friends and colleagues.

On behalf of ESN Council,

Ago, Johannes and Natalia
