

Behavioral, cellular and neurochemical approaches to studying neurodegenerative disorders

International School supported by the International Society for Neurochemistry (ISN) and University of Belgrade – Faculty of Biology

24th – 30th July 2023

Petnica Science Center, Valjevo, Serbia

(<https://neurochem2023.bio.bg.ac.rs/>)

The School on Behavioral, cellular and neurochemical approaches to studying neurodegenerative disorders is an intensive one-week **demonstration and hands-on laboratory practice** school. The aim of the School is to provide a broad knowledge in the field of neurobiology of neurodegenerative disorders, and selected methods commonly applied in neurobiological and neurochemical research.

The School is intended for **Bachelor and Master students in biology, medicine, pharmacology, biochemistry, chemistry, and related fields**. The main focus of the School is to demonstrate to and train the participants to perform the most used methods in neurobiology from behavioral down to the cellular level. Through a combination of lectures from experts in the field and laboratory practice, participants will acquire knowledge and skills that will be beneficial to them in their future research.

Application closes on June 10th 2023 at 23:59 (CET).

To apply for the School follow the link: <https://neurochem2023.bio.bg.ac.rs/registration>
